

Fusion Degreaser / Adhesion Promoter

Introducing Fusion Degreaser/Adhesion Promoter:

A high performance solvent blend with specialised adhesion promoter additives. Designed to prepare challenging surfaces

Fusion Degreaser / Adhesion Promoter is a high-performance solvent blend enhanced with specialised adhesion-promoting additives. Designed to create artificial surface keys on hard-to-coat substrates, it prepares challenging surfaces for optimal coating performance while also functioning as an effective degreasing solvent.

This advanced formulation has been engineered to improve coating adhesion when applying Infinity Effects products to surfaces such as ceramic tiles, metals, plastics, and other low-energy or non-porous materials. As a next-generation pre-primer, it delivers powerful cleaning action while significantly boosting the bonding capabilities of Infinity Effects coatings.

Application is simple: lightly spray the product onto the substrate, then wipe with a clean cloth. Once dry, the treated surface is left perfectly conditioned for direct application of the recommended Infinity Effects coating systems. Extensive testing confirms excellent compatibility with a wide range of substrates, including:

- ✓ Aluminium
- ✓ Stainless Steel
- ✓ Iron
- ✓ Plastics (ABS, UPVC, PVC)
- ✓ Ceramics
- ✓ Porcelain
- ✓ Glazed Ceramic Tiles
- ✓ Porcelain Tiles
- ✓ Vinyl

For substrates not listed above, we recommend contacting Infinity Effects or an authorised representative for guidance, as **Fusion Degreaser / Adhesion Promoter** may also be compatible with surfaces not specifically mentioned.

Whether used in commercial or domestic environments, **Fusion Degreaser / Adhesion Promoter** delivers consistent, reliable adhesion across a wide range of surfaces. Some substrates may still require additional preparation before use. To ensure system integrity and avoid potential failures, we strongly advise carrying out a small test patch using the recommended Infinity Effects over-coat before beginning full application.

Experience the improved adhesion performance of **Fusion Degreaser / Adhesion Promoter**. This innovative product helps Infinity Effects coatings bond smoothly and effectively to ceramic tiles and other compatible surfaces, elevating the quality and durability of your coating projects.

Fusion Degreaser / Adhesion Promoter can be ordered directly from Infinity Effects or through our global distribution partners. All Infinity Effects products are supplied under our Standard Conditions of Sale. While we are committed to offering helpful guidance, guarantees can only be provided for applications that have been confirmed in writing by Infinity Effects or an authorised representative.
