

# INFINITY Tinting Machine

## Introducing Infinity Tinting Machine

The Infinity Tinting Machine is a precision-engineered pigment dispensing system designed to accurately tint Infinity's pigmentable coating and resin ranges.

### Introduction:

The **Infinity Tinting Machine** is a precision-engineered pigment dispensing system designed to accurately tint Infinity's pigmentable coating and resin ranges. The machine is equipped with **16 preloaded canisters, each filled with proprietary Infinity Pigments**, allowing consistent, repeatable colour creation across both water-based and polyaspartic-based systems.

Pre-programmed by Infinity, the tinting machine features over **1,000 factory-calibrated colours**, ensuring colour accuracy, batch-to-batch consistency, and ease of use for distributors and applicators alike. The system is specifically configured for use with Infinity-approved products, removing guesswork and **eliminating the risk of incompatibility**.

Designed with usability in mind, the Infinity Tinting Machine offers an intuitive interface suitable for distributor environments, builders' merchants, and professional coating applicators. Precise pigment dosing ensures uniform colour dispersion without negatively impacting product performance, cure characteristics, or physical properties.

The Infinity Tinting Machine enables distributors to unlock the full potential of Infinity's pigmentable ranges offering rapid colour customisation, reduced stock holding, and expanded design freedom. From seamless interior floors to decorative and industrial coating systems, the machine empowers users to explore the full possibilities of Infinity colour technology with confidence and consistency.

### Electrical / Power Information

Rated Power: 100 W (UK mains)

Supply Voltage: 230 V AC, 50 Hz (UK standard)

Power Consumption: Approx. 0.1 kW under normal load

Plug / Connector: UK 3-pin AC mains plug

### Infinity Tinting Machine - Specification

Type	Tinting Machine
Available Colours	1000+ Colours preprogrammed
Weight	120KG
Machine Dimensions	(W × D × H): 720 × 895 × 1220 mm
