

# INFINITY Poly Pigments

## Introducing Poly Pigments:

Infinity Effect Poly Pigments are specially formulated, in-house manufactured colour pigments designed exclusively for use with Infinity Tinting Machines.

## Infinity Effects Poly Pigments

Infinity Effect Poly Pigments are specially formulated, in-house manufactured colour pigments designed exclusively for use with Infinity Tinting Machines. These advanced pigments integrate seamlessly into the tinting system, unlocking access to over 1,000+ colour possibilities with precision and consistency.

Uniquely engineered to perform with polyaspartic systems, Infinity Effect Poly Pigments do not alter viscosity, reduce working time, or compromise performance—ensuring flawless application and predictable results. Their advanced formulation also offers compatibility with multiple chemistries, making them a versatile solution across a wide range of coating systems.

## Poly Pigments is fully compatible with the following Infinity Products

### Infinity Polyurea Rapid Prime Pigmentable Additon Rate:

Up to 10% of total weight.

Designed for professionals who demand performance without limitation, Infinity Effect Poly Pigments push the boundaries of what's possible in colour, consistency, and control.

### Available Colours:

Black, Blue, Green, Yellow, Mid Yellow, Red, Deep Red, Purple

### Infinity Pushing the Boundaries of Possibilities.

## POLY PIGMENTS - Specification

Type	Liquid
Mix ratio	Consult Infinity Representative
Pack Sizes	2KG
Colour	Read Above Available Colours
Shelf Life & Storage	6 months in original, unopened container. Store in cool, dry conditions
