

# Water-Based Pigments

## Introducing Water-Based Pigments:

Infinity Effect Water-Based Pigments are specially formulated, & designed exclusively for use with Infinity Tinting Machines and our water-based range.

## Infinity Effects Water-Based Pigments

Infinity Effect Water-Based Pigments are specially formulated, colour pigments engineered specifically for water-based paints and coatings, and designed exclusively for use with Infinity Tinting Machines. These advanced pigments disperse seamlessly within water-based systems, delivering access to 1,000+ colour options with exceptional accuracy, consistency, and repeatability.

Developed to maintain the performance characteristics of water-based formulations, Infinity Effect Water-Based Pigments do not affect viscosity, open time, or film formation ensuring smooth application and predictable results. Their advanced formulation also provides broad compatibility across multiple water-based and hybrid chemistries, making them a versatile colouring solution for a wide range of coating systems.

## Poly Pigments is fully compatible with the following Infinity Products

### Infinity ArmourGuard Additon Rate:

Up to 10% of total weight.

### Infinity Hydro Paint Additon Rate:

Up to 20% of total weight.

### Infinity FreshCoat / ExteriPro Additon Rate:

Up to 20% of total weight.

Designed for professionals who demand performance without limitation, Infinity Effect Water-Based Pigments push the boundaries of what's possible in colour, consistency, and control.

### Available Colours:

Black, Blue, Green, Yellow, Mid Yellow, Red, Deep Red, Purple

### Infinity Pushing the Boundaries of Possibilities.

## POLY PIGMENTS - Specification

Type	Liquid
Mix ratio	Consult Infinity Representative
Pack Sizes	4KG
Colour	Read Above Available Colours
Shelf Life & Storage	6 months in original, unopened container. Store in cool, dry conditions
